

MASTER PROGRAMME PEACE AND CONFLICT STUDIES

PACS and Nepal

15.01.2018 - The Master's Programme **PACS - Peace and Conflict Studies Magdeburg** is conducting a research project on the topic: **Nepal and the Disaster-Conflict Interface**. By focussing on the specific case of Nepal, students from different programmes at Otto-von-Guericke-University Magdeburg will analyze the impact and consequences of the massive earthquake of April 2015, which caused large-scale destruction of the country's infrastructure about 8000 casualties.

By focussing on the specific case of Nepal, we want to analyse and discuss the Disaster-Conflict Interface. After a preparation period in Germany during the winter term 2017/18, we will conduct our qualitative research during

two-week excursion to Nepal in February 2018 and in Cooperation with other students from Kathmandu University.

Do you want to accompany the students and their research in Nepal? Follow the student blog: > <http://www.pacs.ovgu.de/Nepal+Blog.html> (<http://www.pacs.ovgu.de/Nepal+Blog.html>)
